

Dear FCC,

I am opposed to the proposal (RM-10051) made by SAVI Technologies as part of ET Docket 01-278. Besides potential issues on other bands, if this were granted, it would make the 70 cm amateur radio band largely unusable. Please help protect the radio spectrum we as amateur radio operators use for communication from harmful interference. Thank you in advance.

Sincerely,

Brice D. Hornback, KA8MAV  
Indianapolis, IN
